E-Kit ™

The Right Tools for the Job

Part # ZL-1100-1 E-Kit ™   NSN# 1560-01-543-3257

The E-Kit contains the AxelCut™, QuickSplice™, and a mounting plate, which allows for the equipment to be mounted on the aircraft for easy access when needed.

Part # ZL-1000-1 AxelCut ™
NSN# 5110-01-521-1998

True one handed cutting capability for airborne hoist cables.

Light weight, cuts clean, fast and easy

Allows for repeated cutting capability.

Reduces life cycle costs, less expensive then hoist squib and refire kits.

Permits hoist installed squib to be used as the backup cable cutter.

Solves the reliability problem with existing cutters, eliminating inadvertent releases, and no-fire possibility.

Unaffected by EMI, lightning, or any other possible hoist system failures.

Qualified to +160ºF, -40ºF, Salt Fog, and Endurance

Part # ZL-6000-3   QuickSplice ™ with Slide Lock Hook

Allows a fast and safe method of attaching a rescue hook when all else fails allowing the mission to be completed!

The intended use for the QuickSplice is to replace the rescue hook, if the wire rope becomes entangled and must be cut or breaks, in circumstances where there are no other options available.

The QuickSplice has been tested to hold loads up to 2500lbs.

Included:

ZOM-1100-1 AxelCut and QuickSplice Mounting Bracket Installation and Operations Procedures

ZOM-1000-1 AxelCut Operating Instructions

ZOM-6000-3 QuickSplice Operating Instruction
